## EDUCATION

**The NorthCap University**  
*Bachelor of Technology in Computer Science (8.5 CGPA)*

Gurugram, Haryana  
Aug. 2022 – July 2026

## EXPERIENCE

### Software Development Intern

Aug. 2025 – Present

*Ensuredit Technologies Pvt. Ltd.*

*Gurugram, India*

- Engineered and integrated **RESTful APIs** using **NestJS** to onboard multiple insurance providers, enabling secure and scalable policy issuance for **motor, health, and appliance insurance** across *EnGateway* and *EnBed* platforms.
- Developed and optimized **React.js frontend components** and **client-specific policy templates**, supporting seamless end-to-end insurance purchase and issuance workflows.
- Implemented **AI-driven automation workflows** using **n8n**, reducing manual intervention and improving efficiency in insurer and client integrations.
- Debugged, tested, and optimized **full-stack features** to ensure high system reliability, performance, and smooth **third-party API integrations**.

### Frontend Development Intern

June 2025 – July 2025

*Arvius Software Pvt. Ltd.*

*Noida, India*

- Developed and optimized **React.js frontend components** for the *Unified Telecom Operations Manager (UTOM)* platform, improving **UI performance** and **code maintainability**.
- Implemented **responsive, reusable UI modules** and resolved frontend issues, strengthening **system integration, usability, and application stability**.
- Collaborated with **cross-functional teams** to debug, test, and deliver **scalable telecom software solutions** in an **agile development environment**.

## PROJECTS

### ElderConnect – Smart AI Companion | *Agentic AI, Voice AI, IoT, Sustainability*

Sept. 2025 – Present

- Designed a comprehensive **AI-powered virtual companion** to support **elderly health, safety, emotional well-being, and social connectivity**.
- Defined **agentic AI behaviors** including medication reminders, mood-driven engagement, fall detection alerts, and emergency SOS response.
- Architected a **voice-first, accessibility-focused system** with offline operation, caregiver dashboards, and privacy-compliant on-device processing.
- Incorporated a **sustainability-first design** featuring eco-mode, solar charging support, recyclable hardware, and energy-optimized AI workflows.

### DermaSense | *Deep Learning, CNNs, Python, NLP, Geolocation APIs*

New Delhi, India

- Built a **skin disease prediction system** using **Convolutional Neural Networks (CNNs)**, achieving **90.4% diagnostic accuracy**.
- Developed an **AI-powered chatbot** for preliminary dermatological consultations, successfully handling **100+ test users**.
- Implemented **secure authentication** and **encrypted medical history storage** to ensure patient data privacy.
- Integrated **geolocation services** to display nearby dermatology clinics, improving accessibility to healthcare services.

## TECHNICAL SKILLS

**Languages:** Java, JavaScript, SQL (MySQL, PostgreSQL), HTML/CSS

**Frameworks:** Node.js, NestJS, Spring Boot, Hibernate, Express.js

**Databases:** MySQL, PostgreSQL

**Libraries & APIs:** React, JWT, Axios, RESTful APIs, OAuth

**Developer Tools:** Git, Docker, n8n, Postman, VS Code, Cursor, Eclipse
